

CASE STUDY - DEEPWATER

DYNASTY DEEPWATER FISHING SAVES OPERATOR \$389,000.00 USD RIG TIME

LOCATION: Deep Water Gulf of Mexico, USA. - Keithly Canyon

CHALLENGE

Operator had set inflatable packer for negative test on surface casing. During operation packer lost pressure and slid down hole to undetermined depth.

DYNASTY SOLUTION

Retrieve inflatable packer from well and avoid costly trip to 24,788' TD in order to push packer into rathole at bottom of well. Run overshot / grapple into well and latch fish top of packer at 6,780' MD and POOH (Pull out of hole) with Packer BHA.

Fishing Job was completed in single trip, saving operator an estimated 2 days rig time x 194,500.00 USD per day = \$389,000.00 saved tripping to bottom.

FISHING TOOLS RUN:

- Overshot / Grapple 6 7/8" ID
- Bumper Jar, 4 Drill Collars
- Crossover Sub 5 1/2" FH
